

X

Applications of Image Processing

10.1	Synthetic Aperture Radar Algorithms <i>Ron Goodman and Walter Carrara</i>	1131
	Synthetic Aperture Radar Overview • Image Formation Algorithms • Image Enhancement • Image Exploitation • Chapter Summary • Acknowledgment • References	
10.2	Computed Tomography <i>R.M. Leahy and R. Clackdoyle</i>	1155
	Introduction • Background • 2D Image Reconstruction • Extending 2D Methods into 3D • 3D Image Reconstruction • Iterative Reconstruction Methods • Summary • References	
10.3	Cardiac Image Processing <i>Joseph M. Reinhardt and William E. Higgins</i>	1175
	Introduction • Coronary Artery Analysis • Analysis of Cardiac Mechanics and Shape • Myocardial Blood Flow (Perfusion) • Electrocardiography • Summary and View of the Future • Acknowledgment • References	
10.4	Computer-Aided Detection and Diagnosis in Mammography <i>Mehul P. Sampat, Mia K. Markey, and Alan C. Bovik</i>	1195
	Introduction • Computer-Aided Detection of Mammographic Abnormalities • Computer-Aided Diagnosis of Mammographic Abnormalities • Commercial Computer-Aided Detection Systems • Recent Advances and Future Directions in Breast Cancer Computer-Aided Detection/Computer-Aided Diagnosis • Acknowledgments • References	
10.5	Fingerprint Classification and Matching <i>Anil Jain and Sharath Pankanti</i>	1219
	Introduction • Emerging Applications • Fingerprint as a Biometric • History of Fingerprints • System Architecture • Fingerprint Sensing • Fingerprint Representation • Feature Extraction • Fingerprint Enhancement • Fingerprint Classification • Fingerprint Matching • Summary and Future Prospects • References	
10.6	Face Recognition from Still Images and Videos <i>Shaohua Kevin Zhou and Rama Chellappa</i>	1235
	Introduction • Framework of Probabilistic Identity Characterization • Instances of Probabilistic Identity Characterization • Conclusions • Acknowledgment • References	
10.7	How Iris Recognition Works <i>John Daugman</i>	1251
	Introduction • Finding an Iris in an Image • Iris Feature Encoding by Two-Dimensional Wavelet Demodulation • The Test of Statistical Independence: Combinatorics of Phase Sequences • Recognizing Irises Regardless of Size, Position, and Orientation • Uniqueness of Failing the Test of Statistical Independence • Decision Environment for Iris Recognition • Speed Performance Summary • Appendix: Two-Dimensional Focus Assessment at the Video Frame Rate • References	
10.8	Exploiting Visual Information in Automatic Speech Processing <i>Petar S. Aleksic, Gerasimos Potamianos, and Aggelos K. Katsaggelos</i>	1263
	Introduction • Analysis of Visual Signals • Audiovisual Information Fusion • Audiovisual Automatic Speech Recognition • Audiovisual Speech Synthesis • Audiovisual Speaker Recognition • Summary and Discussion • References	
10.9	Confocal Microscopy <i>Fatima A. Merchant, Keith A. Bartels, Alan C. Bovik, and Kenneth R. Diller</i>	1291
	Introduction • Image Formation in Confocal Microscopy • Confocal Fluorescence Microscopy • Further Considerations • Types of Confocal Microscopes • Limitations of Confocal Microscopy • Biologic Applications of Confocal Microscopy • Conclusion • References	

10.10	Computer-Assisted Microscopy <i>Fatima A. Merchant and Kenneth R. Castleman</i>	1311
	Introduction • Computer-Assisted Microscopy Systems • Software for Hardware Control • Image Processing and Analysis Software • The Advanced Digital Imaging Research Computerized Microscopy System • Applications in Clinical Cytogenetics • Conclusions • Acknowledgments • References	
10.11	Statistical Models of Targets and Clutter for Use in Bayesian Object Recognition <i>Anuj Srivastava, Michael I. Miller, and Ulf Grenander</i>	1341
	Introduction • Statistical Models • Bayesian Framework • Pose Location Estimation and Performance • Target Recognition and Performance • Discussion • Acknowledgment • References
